### Tools required:

1. Measuring tape
2. Pencil to mark the hole positions
3. Electric drill to set the pilot holes
4. 3/16" Drill bit to set the pilot holes
5. Phillips Head screwdriver
6. Bar of soap

### Mounting of Rack:

1. Use the Spacing Chart above as a guideline to determine the distance between each SUP arm.

4. Rub soap on the screw threads for ease of installation.
5. Mount each SUP per the drawing above.

### Strap Adjustment and Use:

1. After the racks have been attached to the wall, place your SUP on Suspension Straps positioning it on its side.
2. Adjust each strap using the Velcro fasteners so the strap holding the SUP is suspended and not touching a hard surface.
3. Place safety strap (not shown) over your SUP, clip buckles together then pull safety straps to achieve a snug fit.
