

BLOCKSURF

Performance Surfing Gear

PREMIUM QUALITY

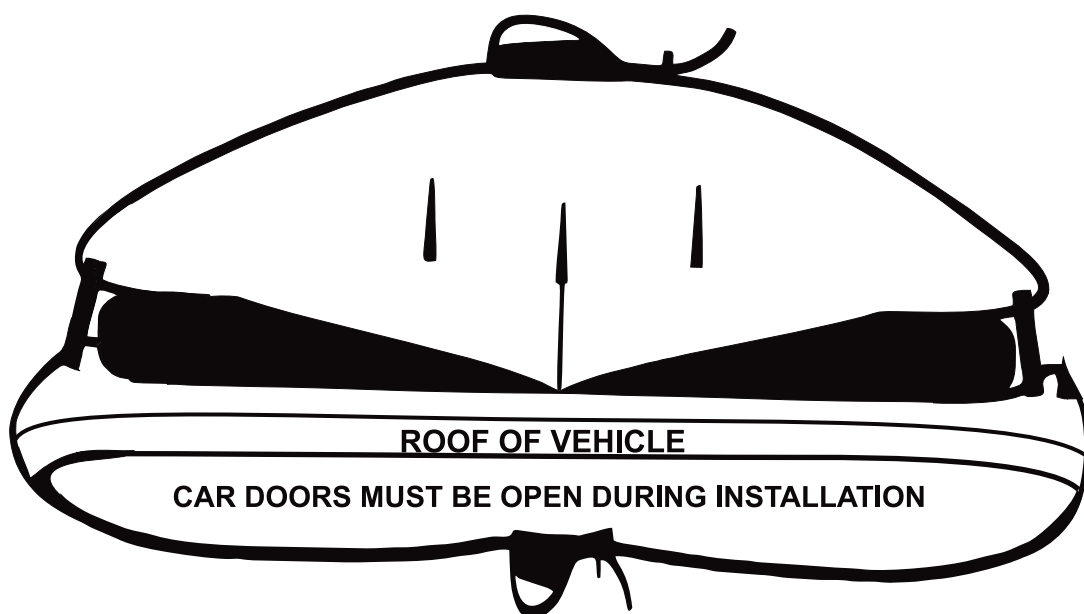

- **SUPER STRONG & SECURE**
- **TREATED UV WEBBING**
- **HIGH DENSITY EVA FOAM PADS**
- **SILICONE COVERED BUCKLES**

INSTRUCTIONS

- Open doors on both sides of vehicle
- Lay Wrap Rax flat on roof at least 2ft apart, parallel to one another
- While doors are open run straps through inside of car
its good to twist the webbing 3 or 4 turns before securing to buckle to avoid humming of webbing
- Secure the straps through the buckle and pull tight

SECURING BOARDS TO WRAP RAX

- Place boards fins up and facing front of vehicle
- Secure strap over boards and secure in buckle and pull tight.
- If boards extend more than 3 ft beyond Wrap Rax pads (eg Longboards,) they need to be secured in front to avoid excessive wind force.
Its better to have more board off back of rack and less in front.

EXTRA TIPS

- Always inspect Wrap Rax during travel and before that the load is secure and that there is no wear of tear
- If there is nay humming noise from your rax simply undo webbing and twist the straps multiple times and secure to eliminate noise.
Excessive humming can cause webbing damage and failure
