

# StoreYourBoard Board Rack

Great for Home Storage & Display!

THANK YOU FOR YOUR PURCHASE.  
PLEASE READ ALL INSTRUCTIONS BEFORE INSTALLING THIS PRODUCT.

## SAFETY INSTRUCTIONS AND PRODUCT WARNINGS

Please use common sense and caution when installing this product. Use this as a guide for installation but please note StoreYourBoard, a Spire LLC company, is not responsible for hazards related to installation, improper, or inadequate mounting. Make sure to wear eye protection during installation and check for electrical wiring inside the wall before any drilling.

### WHAT'S INCLUDED

- 2 Rack Sides
- 4 Mounting Screws
- 4 Drywall Anchors

### WHAT YOU NEED

- Phillips Screw Driver
- Level
- Pencil
- Drill & Drill Bit (if using drywall anchors)
- Stud Finder / Nail & Hammer (optional)

## MOUNTING INSTRUCTIONS

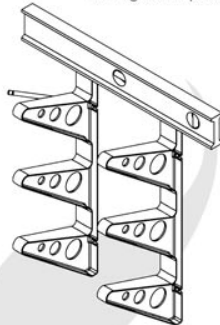

**1** Decide where you want to mount the Board Rack. Ideally you want to anchor the Board Rack to studs. To locate the studs use a stud finder. If you can't find the studs or they don't line up with the correct mounting distance your boards require, you can use the drywall anchors provided.

**2** Place the StoreYourBoard Board Rack vertically against the mounting surface in its desired location, using a level if available. With a pencil, mark the surface at the two mounting slots.  
\*\*\* Each Board Rack side comes with 4 slots (2 on each side). Only 2 screws per rack side are required to anchor the board rack. For extra support you can use all 4 slots if desired.

**3** Remove the StoreYourBoard Board Rack and partially install two screws at the marked locations. If you are using the drywall anchors, screw anchors into drywall first so they are flush with the wall. Then partially install the two screws into the anchors.

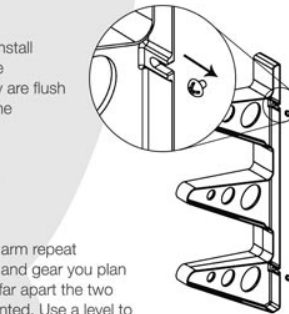

**4** Slide the Board Rack underneath the two screw heads and tighten in place.

**5** To mount the second rack arm repeat steps 2-4. Use the boards and gear you plan to store to determine how far apart the two rack arms need to be mounted. Use a level to make sure the rack sides are mounted at the same height.

**6** Test the Board Rack mounting by applying gentle pressure with your hand.
